[LOW COST CONTRACT SIMS FOR GSM ALARM DIALERS FROM EDGARSSON](#)

A lot of our customers have problems with pay as you go SIM cards. Sometimes they forget to top up and the alarm system fails to call when there is an alarm. Some networks can disconnect SIMs if they don't make a chargeable call within a certain period.

We are now recommending that a contract SIM is better for our devices so we now (in partnership with Wireless Logic) supply low cost contract SIMs on Orange, O2, T-Mobile and Vodafone networks.

Please see attached application form for low cost contract SIM cards for our GSM devices.

Prices are as follows -

Vodafone, Orange, O2, T-Mobile - £3.50 / month

Calls and texts are cheaper than on Pay as you go.

The SIMs can be delivered directly to you for you to fit into the dialler or sent to us to fit into your dialler before we send it to you.

Please see attached application form for low cost contract SIM cards for our GSM devices. If you are interested please fill in the form and return it to us.
